

**VITALITY KAUA'I**

## **SERVICE MENU**

### **NEUROMODULATOR (BOTOX/DYSPORT)**

The ultimate wrinkle relaxer! Botox and Dysport are proteins that relax muscles in the areas where they are injected, softening wrinkles and fine lines.

### **DERMAL FILLER**

Dermal fillers are gel-like substances made from hyaluronic acid, a naturally occurring sugar molecule in the body. They are injected to add contour, balance asymmetry and smooth the skin.

### **SCULPTRA/RADIESSE**

Sculptra and Radiesse are collagen stimulators that are injected into areas of volume loss. They work over time to reduce wrinkles and fine lines and to restore volume in a very natural way.

### **MICRONEEDLING WITH PRF**

Microneedling, also known as CIT (Collagen Induction Therapy), is a skin-rejuvenating procedure that stimulates collagen and elastin, resulting in smoother, firmer, and tighter skin.

### **PRF INJECTIONS**

PRF (platelet rich fibrin) is a plasma preparation, rich in growth factors and stem cells, that stimulates collagen in the areas it is injected, smoothing fine lines and wrinkles. It is also used to stimulate hair growth.

### **PERFECT DERMA CHEMICAL PEEL**

Chemical peels can be used to improve the appearance of the skin of the face, neck, décolleté and hands, resulting in clearer, brighter and smoother skin.

**MONDAY - SATURDAY**
